AutoCAD Product Key is the most-used CAD software globally. According to the 2014 edition of the IDC Worldwide Semiannual CAD & Drafting Tracker, AutoCAD Crack held a 57.1 percent share of the market with a total CAD/drafting market of US\$6.6 billion, reflecting its popularity and success. (IDC, 2014) Autodesk AutoCAD is available for macOS, Windows, and Linux. The most recent version of AutoCAD is the 2018 release, and it runs on the Windows, macOS, and Linux operating systems. The macOS version supports touch for drawing, drawing view, inkscape files, and the digital signature. The Windows version has a new ink function and includes many additional drawing tools. The Linux version of AutoCAD is available for Intel-based and AMD-based PCs. AutoCAD has many of the features of Adobe Illustrator and Adobe Photoshop and is a companion application to Autodesk Inventor. AutoCAD is distributed as a subscription-based product and has different editions for different applications. There are three basic types of editions for AutoCAD: Personal, Team, and Enterprise. 1.1 AutoCAD Personal AutoCAD Personal is available as a desktop app and for mobile devices. It costs US\$99.95 for a one-year subscription and US\$199.95 for a two-year subscription. This personal edition of AutoCAD includes a personal license. This license allows the use of all AutoCAD features, and the user can also view and print files from within the app. There is a limit on the number of AutoCAD users that a company can have using this edition. 1.2 AutoCAD Team AutoCAD Team is available as desktop and mobile apps and as a subscription-based product. It costs US\$149.95 for a one-year subscription, US\$299.95 for a two-year subscription, and US\$399.95 for a five-year subscription. This edition of AutoCAD includes a team license, which allows a company to use up to 50 AutoCAD users with the same license. The license for this edition of AutoCAD can be used in up to four organizations. Each organization can be a company or organization. 1.3 AutoCAD Enterprise AutoCAD Enterprise is available as a desktop

What's New in the AutoCAD?

Add Digital Building Components: Create the foundations of your 3D models quickly with a new collection of geo-enabled 2D shapes, such as points, segments and arcs, to create building components. (video: 1:52 min.) **Annotation Improvements:** Add consistent annotations for both 2D and 3D model objects. Add brush-like annotations to your models with any object. Use properties, or choose an image, a text label or a 3D marker. (video: 1:11 min.) **MDI Improvements:** Merge the MDI documents into one—or open the DesignCenter in your preferred MDI view. Choose from built-in or custom MDI layouts and open the DesignCenter in your preferred MDI view. (video: 2:21 min.) **New Ready Collections:** Shape collections provide rich 3D shapes that can be assembled easily in AutoCAD. In the previously released 2020.1 release, we previewed some of the collections, including Turf and the newly added Geometry. To learn more about these collections and more, check out the following blog post. **Add a geodetic keyframe for a 3D model.** Use tools to mark the fixed coordinates of the 3D model and build your keyframes from these coordinates. You can work with the world's most complete database of geodetic keyframes. (video: 1:40 min.) **Improved Polygon Drawing:** Create complex 3D models with polygons, lines and surfaces. Easily build 3D models using standard line and polygon tools, such as polylines and polyangles. Edit features of existing parts, or draw them. (video: 2:12 min.) **Nested block documentation:** Add and use nested block documentation in AutoCAD. Use the block documentation interface to easily browse, search and navigate through blocks and any associated block documentation. (video: 2:10 min.) **Block Outline Symbols:** Add a Symbols panel to the Block Outline tab to see block outline symbols used throughout the drafting process. Click on a symbol to view details of that symbol. (video: 2:07 min.) **NEW! Dynamic block names in Live Customization:** With this new release, you can use Live Customization to name blocks dynamically based on what it contains, rather than having to manually add all the names.
